unknot

Canonical name Unknot

Date of creation 2013-03-22 13:17:24 Last modified on 2013-03-22 13:17:24 Owner basseykay (877) Last modified by basseykay (877)

Numerical id 6

Author basseykay (877)

Entry type Definition
Classification msc 57M25
Synonym trivial knot
Related topic KnotTheory

The unknot is the knot with a projection containing no crossings, or equivalently the knot with three vertices. The unknot forms an identity when working with the connected sum of knots; that is, if U is the unknot, then K = K # U for any knot K.
